Mobile Open Circuit or Closed Circuit Horizontal Shaft Impact (HSI) Crusher

TC-15 TC-15CC

TC-15/TC-15CC

Mobile Open Circuit or Closed Circuit Horizontal Shaft Impact (HSI) Crusher

CRUSHER

1 15 yd³ Hopper

2 Discharge Pan Feeder

The TC-15 Mobile Open Circuit or Closed Circuit Horizontal Shaft Impact (HSI) Crusher designed for contractors with easy maneuverability, optimal versatility and high productivity. Its 15 yd³ hopper allows you to feed material using a large wheel loader or excavator. And with the unit's 5' x 12' double deck screen and return conveyor that swings out to stockpile material, you can produce as many as four products or just one by simply closing the circuit.

Engine	CAT® C9.3B 415 HP
Hopper Capacity	15 yd ³ hopper
Double Deck Pre Screen	44 inches x 5 feet
Double Deck Screen Box	5 feet x 12 feet
Rotor Size	40 inches x 43 inches

A 15 yd³ hopper features hydraulic sides that fold in for transportation.

A vibrating crusher discharge pan feeder minimizes the risk of ripping a belt when running recycled materials.

The TC-15CC's wireless remote control operates the tracking and operation of the plant while a user-friendly operator control station controls the CAT® power unit as well as all crusher startup and shutdown functions.

The 5' x 12' heavy-duty, high-energy double deck screen works with two side transfer conveyor belts for producing multiple products.
