Portable Conveyor

M-5032

M-5032 Portable Conveyor

CONVEYOR

The IROCK M-5032 portable conveyor is a light duty wheeled stockpiling conveyor that has been designed for high capacity stockpiling operations. The conveyor is perfect for both material stockpiling or material transfer between machines. The machine's small footprint makes it ideal for sites with spatial constraints. Four of these units can be transported in a 40', high cube, open top container, thereby substantially reducing transport costs.

Engine	CAT® C2.2 49 HP
Transport Height	9' 11" (3.04 M)
Transport Length	39' 4" (11.99 M)
Transport Width	8' 2" (2.49 M)
Weight - Base Model	9,020 lb (4,100 kg)
Stockpile Height @ 22 degrees	20' 11" (6.365 m)
Stockpile Capacity - @ 22 degrees	502 yd ³ (384 m ³)
Production	400 TPH
